PROJECT SUMMARY

LED PROPELLER DISPLAY

Topic : Displaying of a given content using Propeller DISPLAY

Domain : IoT

Project Description: To display information like Name, Title, Time and any other information. It is carried out by using some LED's and displaying any information on it. This project is based on concept of Persistence of Vision (POV). It means if an object remains constant at a point while it is moving at very fast speed, then it looks like a stable image or pattern.
